

PART 2 - RATE SCHEDULES AND SERVICE CHARGES OF WATER USE
SECTION A - WATER USE DOMESTIC, COMMERCIAL, INDUSTRIAL AND
AGRICULTURAL USES

The rates to be charged and collected for water and water service supplied in any one month for domestic, commercial, industrial and agricultural uses within Waterworks Districts are established in this Section.

2-A-1 CHARGE FOR METERED SERVICE: Where there are more than one house, store, etc., on a parcel of land under one ownership, the District will, at the option of the District, serve the houses, stores, etc., through one or more water meters. The District will render one water bill for each of the water meters serving the premises.

Each individual ownership will be served through separate water meters.

The charge for water service through each meter will be determined by the addition of the established Service Charge, which is an amount for each size of meter, and of the total Quantity Charge, (including applicable assessments) for the consumption of water, either indicated by the District water meter or estimated by the District. In addition, some Districts have other charges for specific purposes as approved by the Board of Directors and defined within this section.

Meter Size (in.)	Number of Billing Units	Maximum Rated Flow of Service Connection & Meter Installation (gpm)
5/8 x 3/4	1	20
3/4	1	30
3/4 x 1	1	30
1	2	50
1 1/2	3	100
2	5	160
2 1/2	7	200
3	11	315
4	17	500
6	33	1000
8	53	1600
10	77	2300
12	100	3000

2-A-1 CHARGE FOR METERED SERVICE: (Continued)

PRIVATE FIRE PROTECTION SERVICE: The fixed monthly rate to be charged and collected for each service to a private fire protection system shall be the applicable District rates related to the detector check valve size.

The number of billing units for all other type meters and for multiple meter assemblies of any type or various type meters shall be determined by dividing the on-site domestic demand in gpm by 30 gpm.

Private Fire Protection Service (detector check) meters are solely for the purpose of fire protection. All water consumed shall be billed at the Quantity Charge rate of the applicable District. See also RULE 1-H-2.

2-A-1a SERVICE AND QUANTITY CHARGE

SERVICE CHARGE (not including Private Fire Protection Service) is defined as the minimum charge determined by the number of billing units, which is based upon the size of meter. All water consumed shall be billed at the Quantity Charge rate of the applicable District. See also RULE 1-H-2.

QUANTITY CHARGE is defined as a consumption charge for all water.

The "Monthly Service Charge" for each rate table has been rounded to the nearest whole cent as applicable.

2-A-1b FIGURING MINIMUM CHARGE STANDARD: The minimum Service Charge per month is determined by multiplying the minimum charge of one billing unit by the total number of billing units for that meter. All water used shall be sold in accordance with the Quantity Charge. This rule does not apply to detector check meters. See Rule 2-A-1a.

2-A-1c CONTRIBUTING FACTORS NEEDED FOR ADJUSTING WATER RATE: The Engineer may, after an evaluation of fixed costs and expenses which routinely affect the operating costs of a District, administratively adjust the water rate schedule to reflect any changes in these costs and expenses.

Annually on July 1, the Engineer shall review said fixed costs and adjust the District's water rate schedule to compensate for changes in operating costs as affected thereby. The adjusted rate shall be effective approximately thirty (30) days after making the review and notifying the District's customers of the new schedule.

The District Engineer will annually review the water rate schedules and make recommendation to the Board for adjustment on January 1.

The routine fixed costs and expenses are defined as follows:

1. Cost of water purchased.
2. Cost of electrical energy and other fuels.
3. Salary and wages.
4. Overhead costs including costs applied by the County of Los Angeles.

(Continued)

For a District where a portion of the financing of the construction of new and replacement water facilities such as water mains, is derived from a property tax levy and the operating and maintenance expense is paid in part from taxes, the Engineer for the District may establish a water rate schedule for water service to publicly owned premises which do not pay District taxes at higher rates than applicable for water service to tax-paying premises. The higher schedule may not exceed by more than 10 percent, the schedule established for tax-paying premises and may only be applicable for fiscal years in which the District levies taxes for the herein described purposes.

2-A-9b FACILITIES REPAIR SURCHARGE

When the water facility repair expenditures exceed the current year budgeted estimate for the District and no emergency disaster funding is available from State or Federal agencies, the Board of Supervisors, as the governing Board for the District, may find that there is shortage of District General Fund revenues and establish a Facilities Repair Surcharge in an amount not to exceed \$1.00 per 100 cubic feet of water sold. The District must give the customers mailed notice of the amount and duration of the proposed surcharge at least ten days before the Board will consider its approval. The surcharge will become effective no sooner than the first full billing period after the date of the Board approval.

SECTION B - WATER RATES FOR MISCELLANEOUS SERVICES

2-B-4 CONSTRUCTION WATER SERVICE (Metered): The District shall require that all water used for construction purposes be metered. The District will furnish, install, and remove the meter, valve, and fittings to be located at a fire hydrant or other convenient point in the system as determined by the District. The customer shall be responsible for the loss of or damage to the meter and other equipment used therefor. The charge for the metering facility is to guarantee the return of the meter to the District in an operative manner. The installation and removal charge shall be as follows:

Flow tube Fire Hydrant Meter Size (in)	Installation * Removal Charge
2 & smaller	\$242.76
2 1/2	\$274.36
3	\$414.04
4	\$685.08

For the District to relocate the meter from one location to another location at the request of the Customer, the charge is as follows:

Meter Size (in.)	Charge
2 & smaller	\$104.78
2 1/2	\$129.71
3	\$241.11
4	\$399.07

The charges for installation, removal, and relocation of the meters larger than 4-inch or for meters 4-inch and smaller requiring an extraordinary installation, will be on an estimated basis of current costs.

The installation, removal, and relocation charges shall become revenue to the District.
